CHAPTER ONE

Lesson 3 Review: Writing With Purpose

THE GOLDEN RULE

Omit needless words.

THE INVERSE

Give every word a purpose.

What you write depends
on **where** you write it.

Write an objective statement:

I want to:

Get people who need to (job),

are (awareness of brand), and

(awareness of product category),

to (specific action)

on (platform and device).

I want to:

Get people who need to **spend less on razor blades**, are **familiar** with **Harry's**, and **familiar** with **monthly-delivery razors**, to **tap the CTA button** on **Facebook mobile**.

Question 5

What is the *immediate next step*
I want my prospect to take?

In exactly the same way, your second sentence has only one job – to force him to read the third sentence of your ad. Hi Sarah,

While iOS 14.5 rocked ecommerce to its core in 2021 (even though, in some respects, it can be [considered a gift](#)), there is hope for navigating the rough future.

It lies in the data.

As we round out the first month of 2022, we'll cover a handful of metrics affected by iOS 14.5 in trailing 12 month YoY views. Plus, we've calculated a comparison between the three months prior to May – June 2021 (iOS 14.5's release) and the three months after.

All the numbers come from the ~250 stores tracked in [Statlas](#), our ecommerce growth tool.

Let's dive in ...

Facebook spend is up +16.69% in the last 365 days YoY.

When comparing pre- vs. post-iOS 14.5, however, Facebook spend decreased overall.

iOS 14.5 Effect on Weekly Facebook Spend

- Pre-iOS Spend (Feb. - Apr. 2021): \$18,416
- Post-iOS Spend (July - Sept. 2021): \$14,175
- Pre vs Post Spend %-change: -23.03%

The downward trend has continued into 2022, as daily average Facebook spend descended -30.02% in the last 28 days YoY.

Facebook Spend: Daily Average

-30.02% Last 28 Days YoY

CPMs have inflated +51.15% in the last 365 days YoY.

Writing your email body content

How to Approach Email Copy

From Prof. Wood

When you write for email, imagine you're on a store floor talking to an actual customer.

A SIMPLE TIP

Use “you”

THE SAD TRUTH

People skim emails.

THE SAD TRUTH

People skim emails.

Hot Take from Prof. Monforte:

People spend an average of 8 seconds reading an email (if we're lucky enough that they've opened it in the first place).

THE SOLUTION

Make it scannable.

Scannable Emails

- ✓ The content of every sentence is important.
- ✓ Write one sentence so it leads to the next; one section so it leads to the other.
- ✓ The way sentences are structured keeps the eye moving all the way down to your CTA.
- ✓ Use subheadings to break up the content.

At the very least, these bite-sized lessons will make you rethink your current mindset around investing (and life in general).

Content & Tone

Who are you talking
to?

- ✓ Ultimately, email is **to a real person**
- ✓ Give them **valuable content** that's relevant to **what they signed up for**
- ✓ Always link to relevant content on your site
- ✓ Tell a story

Content & Tone

How do you want to
talk to them?

Consider the tone of who you're writing **from**:

- ✓ Your business generally? Be professional.
- ✓ A personality at your business? Write like they talk.
- ✓ A brand? Use the brand voice.

Using Body Copy

✓ The amount of body copy depends on the type of email:

- Newsletters will have more.
- Mobile: Think “above the fold”

✓ Body copy guides the reader to the CTA

✓ Hierarchy: Highlight the main message or offer first, then everything else

🔥 Hot Take from Prof. Morales:

From the subject line to the final block in your email, tie your copy together for it to flow and take your subscriber (hopefully) all the way to the end of your email.

Why This Email Performed Worse

A few possibilities ...

✓ Timing

- Email 1 was sent in August, way before BFCM
- Email 2 was sent in November, in the thick of it

✓ Did not use “you” or “your” in the subject line (not as conversational)

✓ Long headline with more text in the header image

 **Your Business Isn't Broken ...**

... But part of it might be.

The key to growing your business always comes from diagnosing your exact problems through data.

Uncovering these problems (and unearthing opportunities) is possible by stacking each part of your data into a cohesive masterpiece — like "cake."

Learn how to combine your ecommerce data into three "layers" of revenue ...
